

HEALTH GUARANTEE FOR BALLERZ BULLDOGGES KENNEL

I _____ have read the below Health Guarantee and agree to all within, _____ date.

REGULAR VET CHECKS WILL ALLOW THIS GUARANTEE TO BE DOCUMENTED BY YOUR VET. YOU MUST HAVE A PAPER TRAIL FOR YOUR PUPPY'S HEALTH GUARANTEE. WORMINGS, VACCINATION RECORDS, WEIGHT AND HEIGHT OF YOUR PUPPY DOCUMENTED AND ALL VET COMMENTS FOR HIS/HER OVERALL HEALTH. YOU MUST KEEP AND FURNISH ALL VET VISITS AND FOOD RECEIPTS FOR THE PUPPY'S FIRST YEAR OF LIFE. IT IS THAT IMPORTANT FOR A HEALTHY PUPPY. WE ALSO HAVE THE RIGHT WITH YOUR PERMISSION TO CALL YOUR VET AND VERIFY INFORMATION ABOUT YOUR PUPPY IF THERE IS A PROBLEM THAT ARISES.

HEALTH GUARANTEE

Olde English Bulldogges that are bred by responsible breeders are proven to be a healthier breed of dog than many modern Bulldog breeds. The Olde English Bulldogge is quickly becoming well respected in many working venues such as therapy training, obedience, emotional support dogs. They have become excellent breathers and do not have to be kept in an air-conditioned environment on hot days. Artificial insemination is not a standard protocol when breeding Olde English Bulldogges; natural ties are the standard. Caesarean sections are only needed in the event of unexpected complications at delivery like with almost any breed of dog. However, the Bulldogge has been recreated using its counterpart the English bulldog. Certain genes can pull from generations long ago, so it is important to read and understand about these types of bulldog defects.

We strive to produce an extremely healthy family pet the whole family can enjoy for years to come. If your puppy were to have a Genetic Health Issue other than what is deemed "standard" in this

breed (see below paragraph), we require two vet exams from two different clinics and by two different licensed Veterinarians stating the exact descriptive health issue. If the puppy in fact has a health issue, we will replace the puppy with a puppy from an available litter or the next available litter. If we cannot furnish your replacement puppy as promised due to unforeseen circumstances, we will give you the first available replacement of equal value. If you are purchasing from a future litter and the breeding does not happen, we will offer you a new puppy from a different breeding or litter of equal value. Shipping is at the buyer's expense if he/she is returning a puppy.

Explanation for the phrase above (deemed "standard" in this breed).

WE HAVE NEVER HAD A CASE OF THIS IN OUR LINES.

We DO NOT COVER cherry eye, entropion, skin allergies or loose hips . WE DO NOT COVER any dysplasia if the dog has been allowed to be overweight, offered a high calorie-high protein-high calcium level puppy food (ALL RECEIPTS MUST BE SHOWN), exposed to an excessive amount of climbing of stairs, rough housed or played with over extensively the first year of his/her life. This breed derives from the English Bulldog so certain traits can come out in the dog's gene pool. We DO NOT COVER the sound a dog makes when they breathe. All of our dogs breathe freely, however in the past generations of ancestors there could be a dog that had a "sniffing" sound or a "snorting" sound when breathing.

WE DO NOT COVER Mange as it is been proven to be a stress related curable parasite. We cannot control your home environment and we cannot control the stress level your dog has from his environment. Things that can cause a dog stress are moving, changes in home, bad food, flees, ticks or worms, violence, abandonment, illness or food allergy.

To be eligible for a 1-Year Health Guarantee, you must schedule a vet exam within the first 72 hours of having your puppy to validate your guarantee. If you are having trouble scheduling with your vet, you must reach out and let us know as soon as possible. We will give you a delivery time/pickup time in advance so you can consult with your veterinarian to get the puppy's health check-up scheduled.

Vaccinating pets is the pet owner's responsibility. Ballerz Bulldogges will send the puppy home with age appropriate vaccinations and their vet record book.

STANDARD IN THE BREED - PLEASE READ BELOW AND TAKE PRECAUTION FROM OVER PLAYING AND OVER EXERCISING YOUR BULLDOGGE IT'S FIRST 2 YEARS.

Diet plays a large role in bone development. The same applies to calcium. Do not give your new puppy any extra calcium even in a vitamin - find a good well-balanced puppy dog food not exceeding 2% and stick to it. We do require you feed your puppy a high quality pet food for a minimum of the warranty period. We do require and will ask you to furnish receipts of dog food you have fed to your dog.

WHAT YOU FEED YOUR BULLDOG PUPPY IS VERY IMPORTANT

What you feed your dog is how well or not your dog will grow in general health. We ask for the first 2 years of his or her life he/she is fed a high quality large breed puppy food for his or her full growth potential. If you cannot furnish the receipts of the dog food you have fed for the first year, you will forfeit your guarantee. Your Vet can recommend a top-quality dog food. We recommend Taste of the Wild Fish and Wellness Core Salmon and Victor Professional Food. Check the ingredients of your dog food. Stay away from those that have corn or byproduct as the first ingredient. We want you and your puppy to have a lifetime of enjoyment. The Bulldogge is considered an adult at 2 years old.

I understand there is a guarantee that is laid out for my puppy and I will follow it if ANY issues health related or other issues arise with my dog/puppy _____ Buyer Initials
